

Shaunak Mishra

Full-Stack Engineer | React Native, Go, Node.js

Bhubaneswar, India | shaunakmishra374@gmail.com | +91 7462894713 | GitHub | LinkedIn

CAREER SUMMARY

Full-Stack Engineer with hands-on experience building a production Android app in React Native (Expo) and backends in Go and Node.js on PostgreSQL. Owns end-to-end design of database schemas, REST APIs, and containerized deployment (Docker, Azure, Vercel, Railway).

EDUCATION

Institute of Technical Education and Research, SOA University

Bhubaneswar, India

B.Tech in Computer Science & Engineering | CGPA: **8.72 / 10** | Expected Graduation: **Jun 2027** Sep 2023 – Present

SKILLS

Languages: TypeScript, JavaScript, Go, Python

Frontend & Mobile: React, React Native (Expo), Next.js, Redux, Zustand, React Query

Backend: Node.js, Express, Go (Gin), REST API Design, JWT Auth

Database: PostgreSQL (sqlc, migrations, query optimization), MySQL, MongoDB, Cosmos DB

DevOps & Cloud: Docker, Linux, GitHub Actions, Azure Container Apps, Vercel, Railway

Tools & SDKs: Firebase (Auth, FCM, Storage), Razorpay, Azure OpenAI, Git, GDB

PROJECTS

- **Gumla Home Delivery Service — React Native (Expo) Android App** GitHub 2026
React Native, Expo, Go (Gin), PostgreSQL, Docker, Razorpay, Firebase
 - Built a production-grade e-commerce Android app serving dual customer/admin roles in a single **React Native (Expo)** codebase for groceries and essentials delivery; in final testing ahead of Play Store release
 - Designed a 12-table **PostgreSQL** schema with type-safe queries via **sqlc** and a **Go (Gin)** backend on a Handler → Service → Repository architecture; Dockerized and deployed on Railway
 - Implemented Firebase phone auth + JWT with refresh-token rotation, Razorpay payments with webhook idempotency, FCM push with exponential-backoff retry, and Zustand-persisted offline cart
- **WorkflowOS — Multi-Agent Data Processing System** GitHub 2026
Python, TypeScript, Azure OpenAI, Cosmos DB, Next.js, Azure Container Apps
 - Built a 5-agent pipeline that extracts and structures meeting-transcript data into actionable project plans with inter-agent handoff; Next.js dashboard; Dockerized and deployed on Azure Container Apps for the Microsoft Build AI Hackathon 2026
- **Brain Tumor Diagnosis — Benchmarking Study** GitHub 2025 – Present
Python, PyTorch, OpenCV, Grad-CAM — ResNet, DenseNet, MambaOut
 - Designed an end-to-end benchmarking pipeline evaluating 15+ deep learning architectures on MRI datasets; improved minority-class F1 by ~12% and reached ~99.5% accuracy with MambaOut; research paper in preparation under faculty supervision

EXPERIENCE

- **Founding Full Stack Engineer** Live — GitHub
MentoMania — AI-Powered Mentorship Marketplace Dec 2025 – Mar 2026
 - Architected and deployed a mentorship marketplace as sole engineer: MongoDB schema, REST APIs (Next.js), and Vercel deployment
 - Reduced page load time by ~30% via SSR, lazy loading, and memoization; set component-driven standards adopted by a 3-member team
- **Frontend Developer** GitHub Jun 2025 – Aug 2025
CN Nexrus — Coding Ninjas Club, SOA University
 - Built 10+ reusable React components adopted across the platform and optimized filtering logic for DSA problem discovery
 - Resolved 15+ UI/logic bugs and integrated REST APIs with clean data-handling patterns

OPEN SOURCE

- **OpenFoodFacts JavaScript SDK** PR #646 Jun 2025
JavaScript, Unit Testing — Merged PR #646
 - Implemented product image folder logic and unit tests in a production open-source SDK; refactored on maintainer feedback for consistent data handling

ACHIEVEMENTS

- Core Technical Team Member, CodingNinjas 10X on Campus, SOA University (Sep 2025 – Present); mentor 50+ students in DSA and problem-solving
- 300+ problems solved on LeetCode (Arrays, Graphs, DP, Trees, Sliding Window)
